

**SYSTEM AND METHOD FOR PROVIDING ACCESS AND
UTILIZATION OF CONTEXT INFORMATION**

Abstract of the Disclosure

A method provides for access to an electronic profile
5 of a first client to a second client. The method comprises
creating a network accessible electronic profile of the
first client, wherein the electronic profile is accessible
by an active object, wherein the active object is bound to
the electronic profile. The method further comprises
10 defining an access right of the second client, wherein the
access right determines a portion of the electronic profile
of available to the second client via the active object. The
method verifies an identity of the second client, and
provides access to the portion electronic profile to the
15 second client via the active object, wherein the active
object is transferable.
